Insight

Empowering Small Businesses

HPE OfficeConnect solutions help you do more with less – enabling you to share resources and collaborate without the complexity of setting up an enterprise-grade network. OfficeConnect products are simple to manage, affordable and highly reliable for small businesses with no dedicated IT expertise and resources.

Whether you're just starting out or planning to expand your business, OfficeConnect offers a range of wired and wireless solutions to support your small business needs at each stage of your growth.

HPE OfficeConnect networks for small growing businesses are feature-rich, affordable and easy to administer. Our equipment is

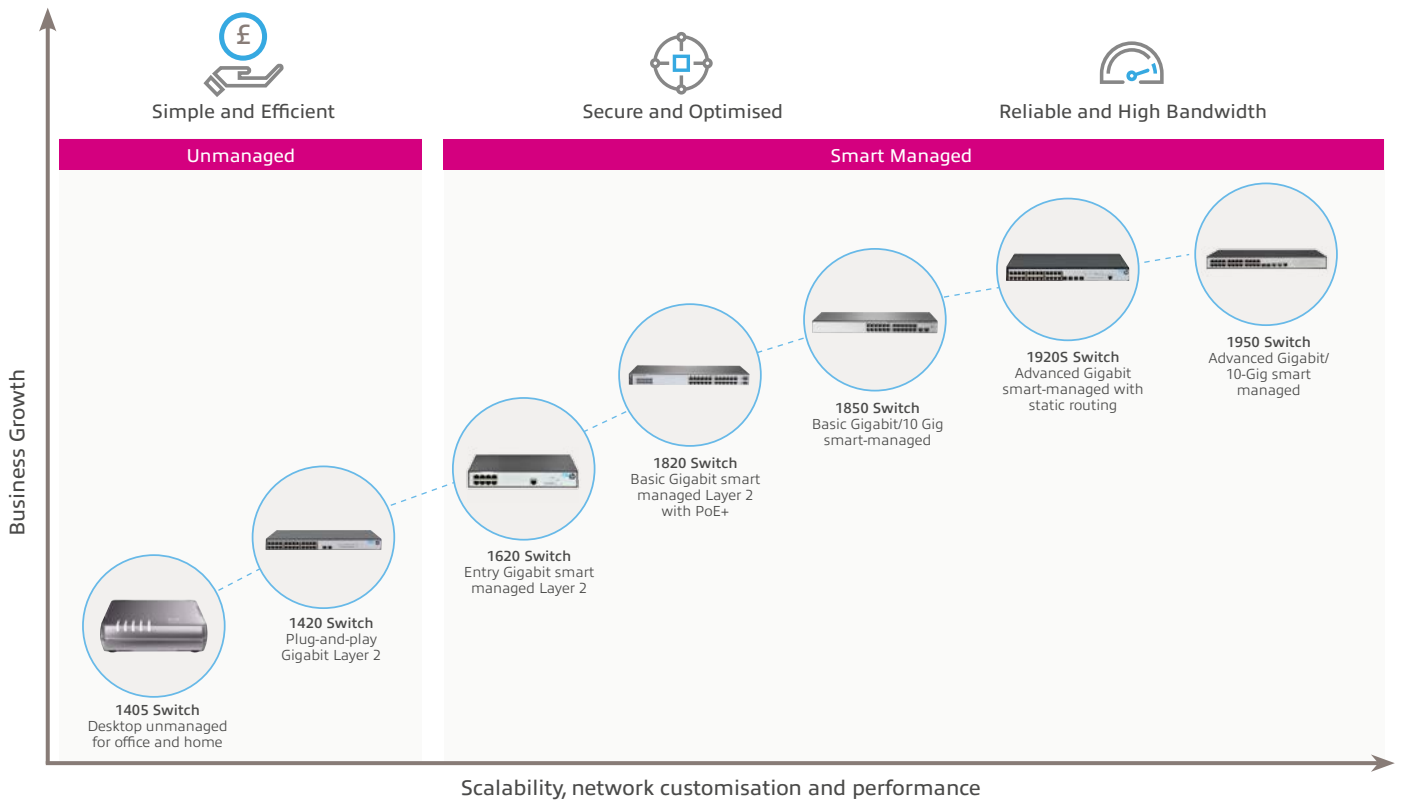

purpose-built for small businesses, delivering the performance and reliability demanded when the network is essential to business operation.

Nearly all OfficeConnect offerings come with a Limited Lifetime Warranty providing advance hardware replacement with next business day shipment in most countries, 24x7 phone support available for the first 90 days, and electronic and business hours phone support for the entire warranty period. See hpe.com/networking/warrantysummary for warranty and support details.

Small Business Solutions For Each Stage of Growth

HPE OfficeConnect Family of Products

HPE OfficeConnect Switches

A Solution for Any Size Business

Empower Your Business

Your network needs to be able to grow with your business. And it needs to deliver the quality experience and secure access that your employees and clients expect. That means a network solution that is affordable and simple to deploy and manage – that can be supported by your limited resources and budget constraints. So you can focus on your business – not managing your network.

Simple, Secure, and Reliable

Keep your business up and running with a secure network infrastructure that is simple to deploy and manage, and can grow with your business. Your network needs to provide the quality of experience that your employees and clients expect – along with the security controls your business demands.

Increase Employee Productivity

Engage with clients and boost employee productivity with an always-on network that can support mobility and cloud-based apps. Whether you are working from home, at your business or with a client, you need a fast and reliable network.

Easy to Set Up. Easy to Manage.

You need a secure and reliable network that can be supported by your limited IT resources. It needs to be simple to set up, and easy to maintain and manage. One that won't break your budget, and can scale with your business needs.

Whether just getting started or expanding your business, the HPE OfficeConnect switching portfolio delivers a range of solutions. From unmanaged plug-and-play simplicity to advanced smart-managed solutions that offer enhanced security and performance, HPE OfficeConnect products support small business needs at every stage of growth. These switches are reliable, affordable, and easy to manage with little or no IT support needed.

Unmanaged Gigabit Switches

HPE OfficeConnect 1405 Switch Series

Designed for affordability, reliability, and low power consumption, these entry-level unmanaged Gigabit Ethernet switches are ideal for home or small offices.

3 year warranty

Key features

- Entry-level switching for small offices
- Plug and play; no configuration required
- Energy efficient, with EEE and idle-port power down
- Quality of Service (IEEE 802.1p and DSCP)

HPE OfficeConnect 1420 Switch Series

These reliable, low-cost plug and play Gigabit Ethernet (GbE) switches offer small business deployment flexibility with a choice of Power-over-Ethernet (PoE+) and 10GbE uplink models.

Limited Lifetime Warranty

Key features

- Choice Power-over-Ethernet (PoE+) and 10GbE uplink models
- Green features for low power consumption
- Fanless design for silent operation
- Quality of Service for improved network efficiency

Smart Web-Managed Gigabit Switches

The NEW HPE OfficeConnect 1920S Switch Series

HPE OfficeConnect 1920S Switch Series delivers enhanced performance and a robust feature set that is optimised for small businesses productivity and efficiency. These advanced Web-managed Gigabit switches offer a cost-effective and secure network solution and better price performance to support today's voice and rich-media applications. Advanced smart managed features provide granular control of the network while simplifying setup, configuration and management. Customisable features include VLANs, Layer 3 static routing, IPv6 support, ACLs, and Spanning Tree Protocols.

Insight Recommends
 HPE OfficeConnect 1920S
 Switch Series

The OfficeConnect 1920S series offers:

- 8-, 24- and 48-port configurations offering a choice of non-PoE+ and PoE+ models. (the 24- and 48-port models include SFP ports for fibre connectivity)
- Intuitive Web-management interface for easy switch configuration
- Flexible installation options, including mounting on wall, under table, or on desktop
- Limited Lifetime Warranty with 24x7 phone support for 90 days

HPE OfficeConnect 1620 Switch Series

Ideal for small businesses looking for an entry-level Web-managed Gigabit Ethernet switch with basic features to enhance network performance and security without the added cost or complexity of more advanced switches.

Key features

- Entry-level, smart managed Layer 2 switches, choice of fanless models
- 8-, 24-, and 48-port gigabit models are rack mountable
- Intuitive Web interface to fine tune switch operation
- VLANs, QoS and IGMP snooping for better network performance

Limited Lifetime Warranty

HPE OfficeConnect 1820 Switch Series

For small businesses looking for better network performance, reliability and security and deployment flexibility these smart-managed Gigabit switches offer the latest energy-saving capabilities with simple administration.

Key features

- Smart managed Layer 2 switches, 24- and 48 port include SFP ports
- Flexible deployment including wall, under table, and desktop mounting
- Non-PoE+ models are fanless for quiet operation
- VLANs, Spanning Tree, link aggregation, IGMP snooping

Limited Lifetime Warranty

HPE OfficeConnect 1850 Switch Series

The HPE OfficeConnect 1850 Switch Series devices are basic smart managed, fixed configuration Gigabit plus 10 Gigabit Ethernet Layer 2 switches designed for small businesses looking for high performance in an easy-to-administer solution.

Limited Lifetime Warranty

Key features

- 10-Gigabit 10GBASE-T on all models for high-speed interconnect
- Non-PoE and PoE+ 24- and 48-port models
- 8-port 10GBASE-T switch with 2 SFP+ dual-personality ports
- Intuitive Web-management interface for easy switch configuration

HPE OfficeConnect 1950 Switch Series

The HPE OfficeConnect 1950 Series is a smart Web-managed 10-Gigabit and Gigabit platform for advanced small business networks needing the highest performance now or in the future.

Limited Lifetime Warranty

Key features

- 10G Connectivity for fast network to servers and storage
- Combination of SFP+ and 10GBASE-T ports supports fibre and cost-effective copper connectivity
- True stacking allows for redundancy while simplifying administration
- Customised operation using intuitive Web interface

Aruba Instant the Controllerless Wi-Fi Solution

There's no easier way to get enterprise-grade Wi-Fi up and running. Aruba Instant delivers the only controllerless Wi-Fi solution that is easy to set-up, and loaded with security to accelerate your business without breaking your budget.

Simple, yet powerful.

Aruba Instant comes with automatic RF management that ensures the strongest Wi-Fi connection for all mobile devices. And granular visibility into mobile apps prioritises business-critical data, and keeps out the malicious content.

Management the way you want it.

When it comes to Wi-Fi management, we give you the flexibility to choose. You can use an Instant access point or a controller to manage an entire cluster of access points. Or you can manage them with a cloud-based or an on-site network management platform.

Aruba Instant Wi-Fi

The undisputable need for users to be productive on their mobile devices is driving organisations everywhere to look for ways to cost-effectively build and support Wi-Fi networks that deliver the best connectivity and user experience.

However, not all controllerless solutions are equal. Some solutions may have some serious limitations if speed and reliability associated with business-grade networks are sacrificed in favour of simplicity. The result can be Wi-Fi disruptions, poor performance, and unhappy users.

Business-Grade Wi-Fi in an Instant

Aruba Instant is the only controllerless Wi-Fi solution that delivers superior Wi-Fi performance, business-grade security, resiliency and flexibility with the simplicity of zero-touch deployment. Aruba Instant is simple to setup and does not require network expertise to deploy and manage. One dynamically-elected Instant AP automatically distributes the network configuration to other Instant APs in the network. Simply power-up one Instant AP, configure it over the air or in the cloud, and plug in the other APs – the entire process takes about five minutes.

The free local management interface, unique to Aruba Instant APs, eliminates dependency or required investment in external network management systems. Instant is a turnkey business-grade Wi-Fi solution that works right out of the box. Even guest access to your network can be secure and uncomplicated for you and all your visitors. Use the simple built-in captive portal or a customisable externally hosted portal for guests to easily login. And secure the network by authenticating users with built-in guest accounts or integrate with external authentication servers.

Aruba Instant Wi-Fi Benefits

Fastest network

- Up to 36%* faster than competition at high density
- Wi-Fi setup in minutes
- Airtime fairness allows more clients to move faster on the network
- Always-on scanning avoids performance-slowng interference
- Aruba Instant APs optimise Wi-Fi channel use and power to speed-up clients

Most resilient network

- 100% functional WLAN without a WAN link
- Integrated spectrum management without compromise to identify and self-heal around Wi-Fi and non-Wi-Fi interference
- Redundant ISP uplink and 3G/4G uplink option

Most flexible architecture

- Single architecture across headquarters, branch and home
- Local, cloud and on-premises management options
- AppRF technology performs deep packet inspection and web content filtering
- Internal RADIUS server on Aruba Instant AP, plus flexible external AAA options
- 100% investment protection to convert to controller-managed APs

* Based on internal testing – IAP225 50 client downstream throughput testing.
